ON/OFF SWITCH

LED TOUCH
SENSOR

DOMED LED light up components: Locate the battery pack under BB-8's dome and pull out connection plastic tab (Three LR44 batteries have been included). Insert antennas as shown. Locate the LED TOUCH sensor as shown to turn on the light up feature.

ON/OFF SWITCH

BASE SLOT

BODY LED light up components: Locate the battery pack under BB-8's sphere and use a phillips screwdriver to access it. Three AAA batteries have been included for you to install. Locate the slot that is used to place BB-8 onto its base.

LED TOUCH
SENSOR

Slide BB-8's sphere onto base key. Locate the LED TOUCH sensor as shown to turn on the light up feature. BB-8's sphere has a magnetized track on top where the dome will be placed. Place BB-8's dome gently on the magnetized area.

EXCLUSIVE:

Use BB-8's magnetized dome to access exclusive hinged panel and insert torch arm.

*Please note to be gentle, as some parts of the product may be fragile.

READ THE INSTRUCTIONS CAREFULLY BEFORE USING THE PRODUCT

Product uses three (3) LR44 batteries for the dome and three (3) AAA batteries for the body.

1. Non rechargeable batteries should not be charged.
2. Do not mix different types of batteries.
3. Do not mix new and used batteries.
4. Only the recommended type of batteries should be used.
5. Batteries should be inserted and oriented with the correct polarity.
6. Exhausted batteries should be removed from the product.
7. The battery terminals must not be short-circuited.
8. Batteries should be disposed in an appropriate place.
9. Remove batteries when not in use or discharged.
