

IRON MAN

1:2 Scale Maquette Assembly Instructions

SIDESHOW
COLLECTIBLES

1 Carefully lower the Iron Man Maquette onto the top of the base. Be sure to align the threaded bolt with the larger openings in the base and align the power connector pin with plug in the base.

Note: This should be done with two people.

2 Attach the provided nuts and washers onto the threaded bolt at the bottom of the base.

3 Tighten the nuts using the provided socket wrench until snug. Be careful not to over-tighten.

4 Plug power cord into the back of the base and to an electrical outlet. Activate lights using the switch on the back of the base.
